Dear Governor Cooper,

I am so happy that you are my Governor. I met your wife at the dedication of the bird friendly garden at your residence in Raleigh. Thank you for designating that week as a native plant week. It is encouraging that you respect the environment and all the beautiful wonders we have in North Carolina

I would like you to not allow the pipeline to go through North Carolina. I think it would be awful for the environment and would be a scar on our state. Renewable energy will be the area of growth that will give rural residents the jobs. Not temporary jobs in a dirty industry. These rural areas get forgotten when problems arise and dirty industries know this. As a person who grew up in a rural area you know what I mean. Look at coal ash spills and GenX contamination. No one wants to admit what they did to people who have little voice.

I know that you will do the right thing. Sstop this pipeline and keep our state growing in clean energy technology.

Thank you for all the work you do. You are truly working for the people of North Carolina and against money interests that would trash our state in the name of greed. I know it is not an easy job and I admire your commitment to our state.

Maura Egan
Raleigh
